

Module VSYS pin is output-only per vendor, so J3-16 is NC; +5V reaches the module via a wire link to its H606 pad.

- GPIO16 = Ignition sense input (digital or ADC)
- GPIO17 = CAN UART TX (drives TJA1051 pin 1 TXD)
- GPIO18 = CAN UART RX (reads TJA1051 pin 4 RXD)
- CAN bit rate: 250 kbps (verify against FMS-standard for your trucks)
- TJA1051 is in listen-only mode (S pin = VIO)
